Ferroelectric Crystals for Photonic Applications

Including Nanoscale Fabrication and Characterization Techniques

This book deals with the latest achievements in the field of ferroelectric domain engineering and characterization at micron- and nano-scale dimensions and periods. The book collects the results obtained in the last years by world scientific leaders in the field, thus providing a valid and unique overview of the state of the art and also a view to future applications of those engineered materials in the field of photonics. ... *more on* <http://springer.com/978-3-540-77963-6>

- Covers the major aspects of ferroelectric domain engineering
- Combines basic research on magnetic materials with device and production orientation
- State-of-the-art report on magnetic materials research and application
